Green Manufacturing Processes and Systems (Materials Forming, Machining and Tribology)

Paulo Davim J

Green Manufacturing Processes and Systems (Materials Forming, Machining and Tribology) Paulo Davim J

This book provides the recent advances on green manufacturing processes and systems for modern industry.

Chapter 1 provides information on sustainable manufacturing through environmentally-friendly machining. Chapter 2 is dedicated to environmentally-friendly machining: vegetable based cutting fluids. Chapter 3 describes environmental-friendly joining of tubes. Chapter 4 contains information on concepts, methods and strategies for zero-waste in manufacturing. Finally, chapter 5 is dedicated to the application of hybrid MCDM approach for selecting the best tyre recycling process.

This book serves as a research book for students at final undergraduate engineering course or at postgraduate level. It is a reference for professionals in industries related to manufacturing and new green jobs (green products, renewable energy, green services and environmental conservation).
