The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) Robert Axelrod

Robert Axelrod is widely known for his groundbreaking work in game theory and complexity theory. He is a leader in applying computer modeling to social science problems. His book *The Evolution of Cooperation* has been hailed as a seminal contribution and has been translated into eight languages since its initial publication. The *Complexity of Cooperation* is a sequel to that landmark book. It collects seven essays, originally published in a broad range of journals, and adds an extensive new introduction to the collection, along with new prefaces to each essay and a useful new appendix of additional resources. Written in Axelrod's acclaimed, accessible style, this collection serves as an introductory text on complexity theory and computer modeling in the social sciences and as an overview of the current state of the art in the field.

The articles move beyond the basic paradigm of the Prisoner's Dilemma to study a rich set of issues, including how to cope with errors in perception or implementation, how norms emerge, and how new political actors and regions of shared culture can develop. They use the shared methodology of agent-based modeling, a powerful technique that specifies the rules of interaction between individuals and uses computer simulation to discover emergent properties of the social system. *The Complexity of Cooperation* is essential reading for all social scientists who are interested in issues of cooperation and complexity

From reader reviews:

Samuel Salamanca:

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite e-book and reading a e-book. Beside you can solve your long lasting problem; you can add your knowledge by the reserve entitled The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity). Try to stumble through book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) as your pal. It means that it can being your friend when you truly feel alone and beside regarding course make you smarter than ever before. Yeah, it is very fortunated for you personally. The book makes you considerably more confidence because you can know everything by the book. So , let me make new experience and knowledge with this book.

Royce Axtell:

What do you concentrate on book? It is just for students because they're still students or that for all people in the world, the actual best subject for that? Just simply you can be answered for that question above. Every person has different personality and hobby for every single other. Don't to be obligated someone or something that they don't need do that. You must know how great along with important the book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity). All type of book are you able to see on many options. You can look for the internet sources or other social media.

Kevin Blais:

Book is to be different for each grade. Book for children until eventually adult are different content. As it is known to us that book is very important for all of us. The book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) has been making you to know about other know-how and of course you can take more information. It doesn't matter what advantages for you. The reserve The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) is not only giving you more new information but also to become your friend when you feel bored. You can spend your current spend time to read your book. Try to make relationship with the book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity). You never experience lose out for everything if you read some books.

Nathaniel Cornelius:

Reading a book can be one of a lot of pastime that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people like it. First reading a guide will give you a lot of new info. When you read a book you will get new information simply because book is one of a number of ways to share the information or their idea. Second, reading through a book will make an individual more imaginative. When you studying a book especially tale fantasy book the author will bring you to imagine the story how the people do it anything. Third, you may share your knowledge to some others. When you read this *The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity)*, it is possible to tells your family, friends and also soon about yours guide. Your knowledge can inspire different ones, make them reading a e-book.
