Fresh Expressions of Church are most significant development in the Church of England in recent decades. Many have called for a thorough theological engagement with the movement. The Church of England is engaging in radical new departures when the ecclesiological thinking for such experiments is far from complete. Parishes are the mainstay of the 'inherited church'. Frequently they are belittled and cast as either unhelpful or irrelevant. The authors argue for the vitality of the parish, both for mission and for discipleship. The authors argue that the forms of the church are to be an embodiment of her faith. They should therefore be more determined by our theological traditions than by the surrounding culture. They show that the traditions of the parish church represent ways in which time, space, community are ordered in relation to God and the gospel.
