**Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering** Susan R. Singer, Natalie R. Nielsen, Heidi A. Schweingruber, Contributions, and Future Directions of Discipline-Based Education Research Committee on the Status, Board on Science Education, Division of Behavioral and Social Sciences and Education, National Research Council

The National Science Foundation funded a synthesis study on the status, contributions, and future direction of discipline-based education research (DBER) in physics, biological sciences, geosciences, and chemistry. DBER combines knowledge of teaching and learning with deep knowledge of discipline-specific science content. It describes the discipline-specific difficulties learners face and the specialized intellectual and instructional resources that can facilitate student understanding.

*Discipline-Based Education Research* is based on a 30-month study built on two workshops held in 2008 to explore evidence on promising practices in undergraduate science, technology, engineering, and mathematics (STEM) education. This book asks questions that are essential to advancing DBER and broadening its impact on undergraduate science teaching and learning. The book provides empirical research on undergraduate teaching and learning in the sciences, explores the extent to which this research currently influences undergraduate instruction, and identifies the intellectual and material resources required to further develop DBER.

*Discipline-Based Education Research* provides guidance for future DBER research. In addition, the findings and recommendations of this report may invite, if not assist, post-secondary institutions to increase interest and research activity in DBER and improve its quality and usefulness across all natural science disciplines, as well as guide instruction and assessment across natural science courses to improve student learning. The book brings greater focus to issues of student attrition in the natural sciences that are related to the quality of instruction. *Discipline-Based Education Research* will be of interest to educators, policy makers, researchers, scholars, decision makers in universities, government agencies, curriculum developers, research sponsors, and education advocacy groups.

**From reader reviews:**

**Helen Jackson:**

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to know everything in the world. Each e-book has different aim as well as goal; it means that guide has different type. Some people feel enjoy to spend their time to read a book. They are reading whatever they consider because their hobby is reading a book. How about the person who don't like reading a book? Sometime, person feel need book when they found difficult problem or exercise. Well, probably you will need this Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering.

**Anthony Jones:**

The book Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering will bring one to the new experience of reading some sort of book. The author style to describe the idea is very unique. In case you try to find new book to study, this book very suited to you. The book Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering is much recommended to you you just read. You can also get the e-book in the official web site, so you can quickly to read the book.

**William Marsh:**

Playing with family in a park, coming to see the sea world or hanging out with buddies is thing that usually you have done when you have spare time, in that case why you don't try point that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering, you are able to enjoy both. It is fine combination right, you still desire to miss it? What kind of hang type is it? Oh can occur its mind hangout men. What? Still don't have it, oh come on its known as reading friends.

**Stephen Stansbury:**

A number of people said that they feel fed up when they reading a reserve. They are directly felt it when they get a half regions of the book. You can choose typically the book Discipline-Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering to make your own reading is interesting. Your skill of reading ability is developing when you including reading. Try to choose simple book to make you enjoy to study it and mingle the sensation about book and examining especially. It is to be initially opinion for you to like to available a book and examine it. Beside that the guide Discipline-

Based Education Research: Understanding and Improving Learning in Undergraduate Science and Engineering can to be your friend when you're sense alone and confuse with the information must you're doing of these time.
