Selected hydrologic data for the upper Rio Hondo basin, Lincoln County, New Mexico, 1945-2003 Lisa C. Donohoe

Demands for ground and surface water have increased in the upper Rio Hondo Basin due to increases in development and population. Local governments are responsible for land-use and development decisions and, therefore, the governments need information about water resources in their areas. Hydrologic data were compiled for the upper Rio Hondo Basin and water-level data were collected during two synoptic measurements in March and July 2003. Water-level data from March 2003 were contoured and compared with contours constructed in 1963. The 5,600-, 5,700-, and 5,800-foot March 2003 contours indicate that water levels rose. The 5,500-foot contour for March 2003 indicates a decline in water level. The 5,400-foot contour of March 2003 and the 1963 contour mostly coincide, indicating a static water level. The 5,300- and 5,200-foot contours for March 2003 cross the 1963 contours, indicating a decline in water levels near the Rio Ruidoso but a rise in water levels near the Rio Bonito. In eight hydrographs, 2003 water levels are shown to be higher than water levels from the mid- to late 1950's in five of the eight wells. For the same period of record, water levels in the three remaining wells were lower. Rising and declining water levels were highest in the northern part of the study area; the median rise was 4.01 feet and the median decline was 3.51 feet. In the southern part of the study area, the median water-level rise was 2.21 feet and the median decline was 1.56 feet.

From reader reviews:

Chris Hernandez:

As people who live in the actual modest era should be update about what going on or details even knowledge to make all of them keep up with the era that is always change and move ahead. Some of you maybe may update themselves by studying books. It is a good choice for you personally but the problems coming to an individual is you don't know which you should start with. This Selected hydrologic data for the upper Rio Hondo basin, Lincoln County, New Mexico, 1945-2003 is our recommendation to help you keep up with the world. Why, since this book serves what you want and want in this era.

Ian Louviere:

The book with title Selected hydrologic data for the upper Rio Hondo basin, Lincoln County, New Mexico, 1945-2003 possesses a lot of information that you can study it. You can get a lot of benefit after read this book. This kind of book exist new information the information that exist in this publication represented the condition of the world currently. That is important to yo7u to learn how the improvement of the world. This particular book will bring you with new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read that anywhere you want.

Laurence Asher:

Many people spending their time period by playing outside with friends, fun activity with family or just watching TV the whole day. You can have new activity to enjoy your whole day by reading a book. Ugh, ya think reading a book can definitely hard because you have to accept the book everywhere? It fine you can have the e-book, getting everywhere you want in your Touch screen phone. Like Selected hydrologic data for the upper Rio Hondo basin, Lincoln County, New Mexico, 1945-2003 which is keeping the e-book version. So , why not try out this book? Let's find.

Samuel Crader:

Reading a e-book make you to get more knowledge from this. You can take knowledge and information from your book. Book is published or printed or outlined from each source in which filled update of news. With this modern era like at this point, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Ready to spend your spare time to spread out your book? Or just trying to find the Selected hydrologic data for the upper Rio Hondo basin, Lincoln County, New Mexico, 1945-2003 when you essential it?
