**Metaheuristic Optimization via Memory and Evolution: 30 (Operations Research/Computer Science Interfaces Series)** Cesar Rego, Bahram Alidaee

Tabu Search (TS) and, more recently, Scatter Search (SS) have proved highly effective in solving a wide range of optimization problems, and have had a variety of applications in industry, science, and government. The goal of Metaheuristic Optimization via Memory and Evolution: Tabu Search and Scatter Search is to report original research on algorithms and applications of tabu search, scatter search or both, as well as variations and extensions having 'adaptive memory programming' as a primary focus. Individual chapters identify useful new implementations or new ways to integrate and apply the principles of TS and SS, or that prove new theoretical results, or describe the successful application of these methods to real world problems.

**From reader reviews:**

**Justin Moore:**

This book untitled Metaheuristic Optimization via Memory and Evolution: 30 (Operations Research/Computer Science Interfaces Series) to be one of several books in which best seller in this year, that's because when you read this publication you can get a lot of benefit into it. You will easily to buy this specific book in the book retailer or you can order it via online. The publisher of the book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Smart phone. So there is no reason for you to past this publication from your list.

**Florence Nguyen:**

Reading a book can be one of a lot of activity that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a publication will give you a lot of new data. When you read a guide you will get new information simply because book is one of various ways to share the information or even their idea. Second, looking at a book will make an individual more imaginative. When you reading a book especially fictional works book the author will bring one to imagine the story how the characters do it anything. Third, it is possible to share your knowledge to others. When you read this Metaheuristic Optimization via Memory and Evolution: 30 (Operations Research/Computer Science Interfaces Series), you could tells your family, friends and soon about yours publication. Your knowledge can inspire different ones, make them reading a guide.

**Clarence Duncan:**

Your reading 6th sense will not betray anyone, why because this Metaheuristic Optimization via Memory and Evolution: 30 (Operations Research/Computer Science Interfaces Series) e-book written by well-known writer who knows well how to make book which might be understand by anyone who else read the book. Written throughout good manner for you, still dripping wet every ideas and creating skill only for eliminate your own personal hunger then you still hesitation Metaheuristic Optimization via Memory and Evolution: 30 (Operations Research/Computer Science Interfaces Series) as good book not simply by the cover but also through the content. This is one reserve that can break don't evaluate book by its handle, so do you still needing a different sixth sense to pick that!? Oh come on your reading through sixth sense already said so why you have to listening to an additional sixth sense.

**Larry Luis:**

Is it you actually who having spare time subsequently spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Metaheuristic Optimization via Memory and Evolution: 30 (Operations Research/Computer Science Interfaces Series) can be the respond to, oh how comes? The new book you know. You are consequently out of date, spending your time by reading in this completely new era is common not a geek activity. So what these publications have than the others?
