This book is the latest publication reporting the results of a series of workplace surveys conducted by the Department of Trade and Industry, the Economic and Social Research Council, the Advisory Conciliation and Arbitration Service and the Policy Studies Institute. It addresses such contemporary employee relations issues as:

- * Have new configurations of labour-management practices become embedded in the British economy?
- * Did the dramatic decline in trade union representation in the 1980s continue throughout the 1990s, leaving more employees without a voice?
- * Are the vestiges of union organisation at the workplace a hollow shell?

The focus of this book is on change, captured by gathering together the enormous bank of data from all four of the large-scale and highly respected surveys, and plotting trends from 1980 to the present. In addition, a special panel of workplaces, surveyed in both 1990 and 1998, reveals the complex processes of change. Comprehensive in scope, the results are statistically reliable and reveal the nature and extent of change in all but the smallest British workplaces. A key text for anyone interested in employment and the changing world of work, whether as student, researcher, teacher, analyst, adviser or practitioner.
