**Siege Weapons of the Far East (2): AD 960?1644: AD 960-1644 v. 2 (New Vanguard)** Stephen Turnbull  
From the 11th century AD, East Asian armies made increasing use of exploding missiles and siege cannon to reduce the fortifications of their enemies. Some of these weapons were very similar to those used in Europe for example, the heavy siege cannon used in the siege of P'yongyang during the Japanese invasion in the late 16th century. Others, like the Korean hwach'a carts mounting over a hundred rockets that were used to bombard the Japanese at Haengju in 1593, were very different from their European contemporaries. This book details the design and use of the wide range of weaponry available during this period.
