Carthago Vol. 4: Les Monolithes de Koubé (French Edition) Christophe Bec

Les gisements de ressources naturelles sont recherchés toujours plus loin, toujours plus profond, au risque de libérer des monstres qu'on croyait depuis longtemps disparus...Lors d'un forage dans une caverne sous-marine, des scaphandriers sont attaqués par un fossile vivant, un megalodon. Ancêtre préhistorique du grand requin blanc, il est le plus féroce prédateur des mers que n'ait jamais connu notre planète. L'océanographe Kim Melville découvre que des spécimens ont survécu dans des grottes sous-marines alors qu'ils sont censés avoir disparu depuis 5 millions d'années ! Une découverte qui pourrait remettre en question l'équilibre écologique de la planète et la survie même de l'humanité.
