Design Energy Simulation for Architects: Guide to 3D Graphics Kjell Anderson

Leading architectural firms are now using in-house design simulation to help make more sustainable design decisions. Taking advantage of these new tools requires understanding of what can be done with simulation, how to do it, and how to interpret the results.

This software-agnostic book, which is intended for you to use as a professional architect, shows you how to reduce the energy use of all buildings using simulation for shading, daylighting, airflow, and energy modeling. Written by a practicing architect who specializes in design simulation, the book includes 30 case studies of net-zero buildings, as well as of projects with less lofty goals, to demonstrate how energy simulation has helped designers make early decisions.

Within each case study, author Kjell Anderson mentions the software used, how the simulation was set up, and how the project team used the simulation to make design decisions. Chapters and case studies are written so that you learn general concepts without being tied to particular software. Each chapter builds on the theory from previous chapters, includes a summary of concept-level hand calculations (if applicable), and gives comprehensive explanations with graphic examples. Additional topics include simulation basics, comfort, climate analysis, a discussion on how simulation is integrated into some firms, and an overview of some popular design simulation software.

From reader reviews:

Gary McIntosh:

This book entitled Design Energy Simulation for Architects: Guide to 3D Graphics to be one of several books which best seller in this year, here is because when you read this book you can get a lot of benefit onto it. You will easily to buy this kind of book in the book shop or you can order it through online. The publisher on this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Smart phone. So there is no reason for your requirements to past this book from your list.

Jeffrey Spencer:

People live in this new moment of lifestyle always attempt to and must have the extra time or they will get wide range of stress from both daily life and work. So , when we ask do people have time, we will say absolutely indeed. People is human not a robot. Then we ask again, what kind of activity are there when the spare time coming to a person of course your answer will unlimited right. Then ever try this one, reading guides. It can be your alternative within spending your spare time, often the book you have read is usually Design Energy Simulation for Architects: Guide to 3D Graphics.

Jon Estrada:

Reading can called brain hangout, why? Because when you find yourself reading a book specifically book entitled Design Energy Simulation for Architects: Guide to 3D Graphics your head will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely can be your mind friends. Imaging each word written in a e-book then become one application form conclusion and explanation this maybe you never get ahead of. The Design Energy Simulation for Architects: Guide to 3D Graphics giving you an additional experience more than blown away the mind but also giving you useful info for your better life in this era. So now let us present to you the relaxing pattern is your body and mind will be pleased when you are finished studying it, like winning a. Do you want to try this extraordinary wasting spare time activity?

Richard Dean:

In this era globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher that print many kinds of book. Often the book that recommended to you personally is Design Energy Simulation for Architects: Guide to 3D Graphics this guide consist a lot of the information on the condition of this world now. That book was represented how can the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. Often the writer made some research when he makes this book. This is why this book ideal all of you.
