## **Water Productivity in Rainfed Agriculture: UNESCO-IHE PhD Thesis** Hodson Makurira

The challenge of water scarcity as a result of insufficient seasonal rainfall and dry spell occurrences during cropping seasons is compounded by inefficient agricultural practices by smallholder farmers where insignificant soil and water conservation efforts are applied. The hypothesis of this research is that many of the past research efforts have taken a fragmented approach to deal with the challenges facing subsistence farmers in rainfed systems.

The research has been conducted in the semi-arid Makanya catchment of northern Tanzania and has successfully applied different analytical techniques to better understand soil and water interactions at field scale. It has been demonstrated that there is indeed scope to increase crop water productivity provided the local farmers adopt more efficient cultivation techniques. Substantial yield increases occur as a result of diverting runoff and these further improve when other techniques such as ripping, application of manure and cover cropping are introduced. This confirms that no single solution exists to solve the problem of low yields in rainfed farming systems.

However, even with these promising results, the research has shown that there is room to further improve the efficiency of crop water use through improvement in research approaches and exploration of better techniques.

### **From reader reviews:**

#### **Kim Duncan:**

In other case, little persons like to read book Water Productivity in Rainfed Agriculture: UNESCO-IHE PhD Thesis. You can choose the best book if you appreciate reading a book. As long as we know about how is important any book Water Productivity in Rainfed Agriculture: UNESCO-IHE PhD Thesis. You can add know-how and of course you can around the world by a book. Absolutely right, due to the fact from book you can recognize everything! From your country till foreign or abroad you will end up known. About simple thing until wonderful thing you may know that. In this era, we can open a book or even searching by internet gadget. It is called e-book. You can use it when you feel bored stiff to go to the library. Let's go through.

#### **Billie Sneed:**

In this 21st centuries, people become competitive in every single way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of the crowded place and notice by surrounding. One thing that occasionally many people have underestimated the item for a while is reading. That's why, by reading a reserve your ability to survive improve then having chance to endure than other is high. In your case who want to start reading the book, we give you that Water Productivity in Rainfed Agriculture: UNESCO-IHE PhD Thesis book as beginner and daily reading reserve. Why, because this book is usually more than just a book.

#### **Allen Ellis:**

Do you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Try and pick one book that you just dont know the inside because don't determine book by its protect may doesn't work this is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside look likes. Maybe you answer may be Water Productivity in Rainfed Agriculture: UNESCO-IHE PhD Thesis why because the excellent cover that make you consider about the content will not disappooint an individual. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly direct you to pick up this book.

#### **Beverly Turner:**

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from a book. Book is composed or printed or outlined from each source that filled update of news. In this particular modern era like at this point, many ways to get information are available for you actually. From media social like newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just looking for the Water Productivity in Rainfed Agriculture: UNESCO-IHE PhD Thesis when you necessary it?
