## Construction for a Sustainable Environment

The past fifty years have seen rapid development of public and governmental awareness of environmental issues. Engineers and scientists have made tangible contributions to environmental protection. However, further theoretical and practical developments are necessary to address mankind's growing demands on the environment. Construction for a Sustainable Environment includes recent developments relating to construction and the environment, including: (1) engineered disposal of wastes; (2) treatment of contaminated and derelict land; (3) sustainable construction and infrastructure; (4) supporting the natural environment. *Construction for a Sustainable Environment* presents clear evidence that common sustainability issues are encountered throughout the world and that only a concerted, international and interdisciplinary approach can tackle these issues.
