Space-Time Processing for MIMO Communications

Space-Time Processing for MIMO Communications

Driven by the desire to boost the quality of service of wireless systems closer to that afforded by wireline systems, space-time processing for multiple-input multiple-output (MIMO) wireless communications research has drawn remarkable interest in recent years. Exciting theoretical advances have been complemented by rapid transition of research results to industry products and services, thus creating a vibrant new area.

Space-time processing is a broad area, owing in part to the underlying convergence of information theory, communications and signal processing research that brought it to fruition. This book presents a balanced and timely introduction to space-time processing for MIMO communications, including highlights of emerging trends, such as spatial multiplexing and joint transceiver optimization.

- Includes detailed coverage of wireless channel sounding, modelling, characterization and model validation.
- Provides state-of-the-art research results on space-time coding, including comprehensive tutorial coverage of orthogonal space-time block codes.
- Discusses important recent developments in spatial multiplexing, transmit beam-forming, pre-coding and joint transceiver design for the multi-user MIMO downlink using full or partial CSI.
- Illustrates all theory with numerous examples gleaned from cutting-edge research from around the globe.

This valuable resource will appeal to engineers, developers and consultants involved in the design and implementation of space-time processing for MIMO communications. Its accessible format, amply illustrated with real world case studies, contains relevant, detailed advice for postgraduate students and researchers specializing in this field.

From reader reviews:

Cynthia Richards:

This Space-Time Processing for MIMO Communications are generally reliable for you who want to be a successful person, why. The reason why of this Space-Time Processing for MIMO Communications can be one of many great books you must have is actually giving you more than just simple studying food but feed you with information that might be will shock your before knowledge. This book is usually handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed types. Beside that this Space-Time Processing for MIMO Communications giving you an enormous of experience including rich vocabulary, giving you trial run of critical thinking that we know it useful in your day activity. So , let's have it and luxuriate in reading.

Shirley Raine:

Space-Time Processing for MIMO Communications can be one of your beginning books that are good idea. We recommend that straight away because this e-book has good vocabulary that could increase your knowledge in vocabulary, easy to understand, bit entertaining but nevertheless delivering the information. The article author giving his/her effort to place every word into pleasure arrangement in writing Space-Time Processing for MIMO Communications although doesn't forget the main level, giving the reader the hottest along with based confirm resource details that maybe you can be one of it. This great information can drawn you into brand new stage of crucial imagining.

Floyd Alling:

Beside this kind of Space-Time Processing for MIMO Communications in your phone, it may give you a way to get more close to the new knowledge or information. The information and the knowledge you might got here is fresh through the oven so don't be worry if you feel like an previous people live in narrow community. It is good thing to have Space-Time Processing for MIMO Communications because this book offers to you personally readable information. Do you sometimes have book but you seldom get what it's all about. Oh come on, that would not happen if you have this in your hand. The Enjoyable blend here cannot be questionable, such as treasuring beautiful island. Techniques you still want to miss this? Find this book and read it from at this point!

Darlene Lewis:

What is your hobby? Have you heard this question when you got scholars? We believe that that problem was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. And you also know that little person including reading or as reading through become their hobby. You should know that reading is very important along with book as to be the issue. Book is important thing to provide you knowledge, except your current teacher or lecturer. You will find good news or update with regards to something by book. Amount types of books that can you choose to adopt be your object. One of them is niagra Space-Time Processing for MIMO Communications.
