Finite Geometry and Combinatorial Applications (London Mathematical Society Student Texts)

Simeon Ball

The projective and polar geometries that arise from a vector space over a finite field are particularly useful in the construction of combinatorial objects, such as latin squares, designs, codes and graphs. This book provides an introduction to these geometries and their many applications to other areas of combinatorics. Coverage includes a detailed treatment of the forbidden subgraph problem from a geometrical point of view, and a chapter on maximum distance separable codes, which includes a proof that such codes over prime fields are short. The author also provides more than 100 exercises (complete with detailed solutions), which show the diversity of applications of finite fields and their geometries. Finite Geometry and Combinatorial Applications is ideal for anyone, from a third-year undergraduate to a researcher, who wishes to familiarise themselves with and gain an appreciation of finite geometry.

From reader reviews:

Paul Skeens:

Reading a guide can be one of a lot of task that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people like it. First reading a book will give you a lot of new data. When you read a reserve you will get new information simply because book is one of many ways to share the information or their idea. Second, looking at a book will make an individual more imaginative. When you looking at a book especially fictional book the author will bring that you imagine the story how the characters do it anything. Third, you are able to share your knowledge to other people. When you read this Finite Geometry and Combinatorial Applications (London Mathematical Society Student Texts), you may tells your family, friends along with soon about yours reserve. Your knowledge can inspire the others, make them reading a reserve.

Anne Stewart:

In this era which is the greater person or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple solution to have that. What you must do is just spending your time not much but quite enough to possess a look at some books. Among the books in the top checklist in your reading list is usually Finite Geometry and Combinatorial Applications (London Mathematical Society Student Texts). This book which can be qualified as The Hungry Mountains can get you closer in becoming precious person. By looking up and review this e-book you can get many advantages.

Margie Sutton:

What is your hobby? Have you heard which question when you got college students? We believe that that issue was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you know that little person like reading or as studying become their hobby. You have to know that reading is very important and book as to be the issue. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You find good news or update concerning something by book. Amount types of books that can you decide to try be your object. One of them is Finite Geometry and Combinatorial Applications (London Mathematical Society Student Texts).

Ann Potter:

A number of people said that they feel uninterested when they reading a guide. They are directly felt this when they get a half regions of the book. You can choose the particular book Finite Geometry and Combinatorial Applications (London Mathematical Society Student Texts) to make your personal reading is interesting. Your own skill of reading talent is developing when you including reading. Try to choose basic book to make you enjoy you just read it and mingle the opinion about book and reading through especially. It is to be initially opinion for you to like to open up a book and examine it. Beside that the reserve Finite Geometry and Combinatorial Applications (London Mathematical Society Student Texts) can to be your new

friend when you're experience alone and confuse with what must you're doing of this time.
