Marine and Offshore Corrosion: Marine Engineering Series Kenneth A Chandler

Marine and Offshore Corrosion describes the principles of effective corrosion control treatments in marine environments, with emphasis on economic solutions to corrosion. The book explains chemical or electrochemical reaction of an alloy with its environment leading to corrosion, and mechanical loss of the metal by erosion, abrasion, or wear resulting also in corrosion. A main consideration of erosion control that the engineer should look into is the economic side. Other considerations that he should investigate are the strength of a structure, time for construction, availability of materials, and costs. The book also discusses the marine environment consisting of sea water, temperature fluctuations, dissolved gases, hydrogen sulphide, ammonia, carbon dioxide, electrical conductivity, fouling. The text describes the selection of materials to be used in marine environments, surface preparation of steel before painting, the type of paint, and metallic coatings. Some of the factors in selecting coating systems are: cost and estimated life before the first scheduled maintenance, adhesion properties, moisture tolerance, elasticity, chemical resistance, impact resistance, bacterial resistance. The factors affecting maintenance include environmental conditions, quality of initial protection applied, type of structure, as well as the design and purpose of the structure. The book has been prepared for engineers and designers who are not corrosion specialists but have to deal with marine corrosion problems as part of their day-to-day professional activities. The text will also turn out to be useful for engineers with general interest in structure, building, or machinery maintenance specially those located near coastal areas.

From reader reviews:

Edna Pilon:

Marine and Offshore Corrosion: Marine Engineering Series can be one of your basic books that are good idea. Most of us recommend that straight away because this e-book has good vocabulary that may increase your knowledge in language, easy to understand, bit entertaining but delivering the information. The author giving his/her effort to put every word into enjoyment arrangement in writing Marine and Offshore Corrosion: Marine Engineering Series although doesn't forget the main stage, giving the reader the hottest and based confirm resource info that maybe you can be among it. This great information can easily drawn you into completely new stage of crucial contemplating.

Cathrine Hart:

This Marine and Offshore Corrosion: Marine Engineering Series is fresh way for you who has curiosity to look for some information given it relief your hunger info. Getting deeper you into it getting knowledge more you know or you who still having little digest in reading this Marine and Offshore Corrosion: Marine Engineering Series can be the light food for you personally because the information inside this particular book is easy to get by anyone. These books create itself in the form that is reachable by anyone, sure I mean in the e-book contact form. People who think that in e-book form make them feel sleepy even dizzy this guide is the answer. So there is not any in reading a book especially this one. You can find actually looking for. It should be here for you. So , don't miss it! Just read this e-book kind for your better life and also knowledge.

Billie Brown:

With this era which is the greater man or who has ability in doing something more are more treasured than other. Do you want to become certainly one of it? It is just simple strategy to have that. What you have to do is just spending your time almost no but quite enough to have a look at some books. One of several books in the top collection in your reading list is usually Marine and Offshore Corrosion: Marine Engineering Series. This book which is qualified as The Hungry Hills can get you closer in growing to be precious person. By looking upwards and review this guide you can get many advantages.

Marylouise Potter:

As a university student exactly feel bored to help reading. If their teacher asked them to go to the library or make summary for some book, they are complained. Just little students that has reading's internal or real their interest. They just do what the educator want, like asked to the library. They go to generally there but nothing reading really. Any students feel that reading is not important, boring along with can't see colorful images on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Marine and Offshore Corrosion: Marine Engineering Series can make you feel more

interested to read.
