## Military Nanotechnology: Potential Applications and Preventive Arms Control (Contemporary Security Studies) Jürgen Altmann

With revolutionary changes in nanotechnology (NT) now on the horizon, many countries have started major research and development (R&D) programmes, which are mainly civilian. Often overlooked are military R&D programmes – in particular those of the US government. This is the first systematic and comprehensive presentation of the potential military applications of NT.

In ten to twenty years, these applications may include extremely small computers, robots, missiles, satellites, launchers and sensors. They may also provide lighter and stronger materials for vehicles and weapons, implants in soldiers' bodies, metal-free firearms, autonomous fighting systems, and smaller chemical and biological weapons.

These potential uses raise strong concerns. This assessment is made from a viewpoint of international security, considering the new criteria of dangers for arms control and the international law of warfare, dangers for stability through potential new arms races and proliferation, and dangers for humans and society. Some military applications, such as computers, will be so close to civilian uses that limits are impractical. Others, such as sensors for biological-warfare agents, may contribute to stronger protection against terrorist attacks and better verification of compliance with arms-control treaties.

For preventive limitation of these new technologies, specific approaches are proposed that balance positive civilian uses and take into account verification of compliance, with a view to international peace and security, not national military strength.

This book will be of great interest to scholars of military technology, non-lethal weapons, disarmament and security studies in general.

### **From reader reviews:**

#### **Derek Morton:**

What do you concentrate on book? It is just for students since they are still students or that for all people in the world, the particular best subject for that? Simply you can be answered for that issue above. Every person has diverse personality and hobby for each and every other. Don't to be forced someone or something that they don't want do that. You must know how great along with important the book Military Nanotechnology: Potential Applications and Preventive Arms Control (Contemporary Security Studies). All type of book would you see on many resources. You can look for the internet sources or other social media.

#### **Angela Taylor:**

Reading a guide can be one of a lot of action that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new info. When you read a e-book you will get new information since book is one of numerous ways to share the information or perhaps their idea. Second, studying a book will make you more imaginative. When you reading through a book especially fictional book the author will bring someone to imagine the story how the personas do it anything. Third, you could share your knowledge to others. When you read this Military Nanotechnology: Potential Applications and Preventive Arms Control (Contemporary Security Studies), you could tells your family, friends and soon about yours reserve. Your knowledge can inspire different ones, make them reading a e-book.

#### **Donna Eldridge:**

The guide untitled Military Nanotechnology: Potential Applications and Preventive Arms Control (Contemporary Security Studies) is the reserve that recommended to you you just read. You can see the quality of the e-book content that will be shown to an individual. The language that publisher use to explained their way of doing something is easily to understand. The article writer was did a lot of analysis when write the book, hence the information that they share for your requirements is absolutely accurate. You also will get the e-book of Military Nanotechnology: Potential Applications and Preventive Arms Control (Contemporary Security Studies) from the publisher to make you more enjoy free time.

#### **Marline Deluca:**

Do you like reading a e-book? Confuse to looking for your best book? Or your book has been rare? Why so many question for the book? But almost any people feel that they enjoy with regard to reading. Some people likes looking at, not only science book but also novel and Military Nanotechnology: Potential Applications and Preventive Arms Control (Contemporary Security Studies) or maybe others sources were given information for you. After you know how the fantastic a book, you feel desire to read more and more. Science guide was created for teacher or maybe students especially. Those ebooks are helping them to bring their knowledge. In additional case, beside science book, any other book likes Military Nanotechnology:

Potential Applications and Preventive Arms Control (Contemporary Security Studies) to make your spare time far more colorful. Many types of book like this one.
