Handbook of Food Processing Equipment (Food Engineering Series)

George D. Saravacos, Athanasios E. Kostaropoulos

Handbook of Food Processing Equipment (Food Engineering Series) George D. Saravacos, Athanasios E. Kostaropoulos

Recent publications in food engineering concern mainly food process engineering, which is related to chemical engineering, and deals primarily with unit operations and unit processes, as applied to the wide variety of food processing operations. Relatively less attention is paid to the design and operation of food processing equipment, which is necessary to carry out all of the food processes in the food plant. Significant technical advances on processing equipment have been made by the manufacturers, as evidenced by the efficient modern food processing plants. There is a need to relate advances in process engineering to processing equipment, and vice versa. This book is an attempt to apply the established principles of transport phenomena and unit operations to the design, selection, and operation of food processing equipment. Since food processing equipment is still designed empirically, due to the complexity of the processes and the uncertainty of food properties, description of some typical industrial units is necessary to understand the operating characteristics. Approximate values and data are used for illustrative purposes, since there is an understandable lack of published industrial data.

From reader reviews:

Shari Yung:

In this 21st hundred years, people become competitive in each way. By being competitive at this point, people have do something to make these survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that often many people have underestimated that for a while is reading. Yep, by reading a book your ability to survive boost then having chance to stand up than other is high. For you personally who want to start reading the book, we give you this particular Handbook of Food Processing Equipment (Food Engineering Series) book as nice and daily reading guide. Why, because this book is greater than just a book.

Kenneth Handy:

Often the book Handbook of Food Processing Equipment (Food Engineering Series) will bring that you the new experience of reading any book. The author style to elucidate the idea is very unique. When you try to find new book to see, this book very acceptable to you. The book Handbook of Food Processing Equipment (Food Engineering Series) is much recommended to you to see. You can also get the e-book through the official web site, so you can more easily to read the book.

Samantha Peay:

Are you kind of stressful person, only have 10 or even 15 minute in your morning to upgrading your mind ability or thinking skill possibly analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your limited time to read it because this all time you only find e-book that need more time to be read. Handbook of Food Processing Equipment (Food Engineering Series) can be your answer mainly because it can be read by you who have those short extra time problems.

Paul Herbert:

Publication is one of source of knowledge. We can add our know-how from it. Not only for students but in addition native or citizen have to have book to know the update information of year to year. As we know those books have many advantages. Beside most of us add our knowledge, can bring us to around the world. By book Handbook of Food Processing Equipment (Food Engineering Series) we can take more advantage. Don't you to definitely be creative people? To be creative person must like to read a book. Only choose the best book that appropriate with your aim. Don't end up being doubt to change your life by this book Handbook of Food Processing Equipment (Food Engineering Series). You can more appealing than now.
