## **Termites in the Canberra Region** JAL Watson

This second edition reflects the changing emphasis in termite identification and control. The first step in coping with termites is still the location and treatment of their nests but there is greater emphasis on barrier treatments to exclude them from buildings, and the need to install barriers during construction no matter where the building is sited. This book is well illustrated with black and white photographs and the text carefully discusses control and precautions necessary for all buildings. While referring to the Canberra region and south coast of NSW, the lessons to be learned will be valuable to any region with termite problems.
