Generalized Linear Mixed Models: Modern Concepts, Methods and Applications (Chapman & Hall/CRC Texts in Statistical Science) Walter W. Stroup

Generalized Linear Mixed Models: Modern Concepts, Methods and Applications presents an introduction to linear modeling using the generalized linear mixed model (GLMM) as an overarching conceptual framework. For readers new to linear models, the book helps them see the big picture. It shows how linear models fit with the rest of the core statistics curriculum and points out the major issues that statistical modelers must consider.

Along with describing common applications of GLMMs, the text introduces the essential theory and main methodology associated with linear models that accommodate random model effects and non-Gaussian data. Unlike traditional linear model textbooks that focus on normally distributed data, this one adopts a generalized mixed model approach throughout: data for linear modeling need not be normally distributed and effects may be fixed or random.

With numerous examples using SAS® PROC GLIMMIX, this book is ideal for graduate students in statistics, statistics professionals seeking to update their knowledge, and researchers new to the generalized linear model thought process. It focuses on data-driven processes and provides context for extending traditional linear model thinking to generalized linear mixed modeling.

See Professor Stroup discuss the book.

From reader reviews:

Cory Marshall:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite publication and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the publication entitled Generalized Linear Mixed Models: Modern Concepts, Methods and Applications (Chapman & Hall/CRC Texts in Statistical Science). Try to make the book Generalized Linear Mixed Models: Modern Concepts, Methods and Applications (Chapman & Hall/CRC Texts in Statistical Science) as your friend. It means that it can to be your friend when you really feel alone and beside that course make you smarter than ever before. Yeah, it is very fortuned for yourself. The book makes you considerably more confidence because you can know almost everything by the book. So , let us make new experience and knowledge with this book.

Princess Bequette:

As people who live in the particular modest era should be up-date about what going on or details even knowledge to make these individuals keep up with the era that is always change and move forward. Some of you maybe will certainly update themselves by reading books. It is a good choice for you but the problems coming to anyone is you don't know what kind you should start with. This Generalized Linear Mixed Models: Modern Concepts, Methods and Applications (Chapman & Hall/CRC Texts in Statistical Science) is our recommendation so you keep up with the world. Why, as this book serves what you want and need in this era.

Michael Kimbrell:

The ability that you get from Generalized Linear Mixed Models: Modern Concepts, Methods and Applications (Chapman & Hall/CRC Texts in Statistical Science) may be the more deep you excavating the information that hide into the words the more you get considering reading it. It does not mean that this book is hard to recognise but Generalized Linear Mixed Models: Modern Concepts, Methods and Applications (Chapman & Hall/CRC Texts in Statistical Science) giving you joy feeling of reading. The article author conveys their point in selected way that can be understood by anyone who read the item because the author of this e-book is well-known enough. This particular book also makes your own personal vocabulary increase well. So it is easy to understand then can go along, both in printed or e-book style are available. We suggest you for having this particular Generalized Linear Mixed Models: Modern Concepts, Methods and Applications (Chapman & Hall/CRC Texts in Statistical Science) instantly.

Daniel England:

Within this era which is the greater man or woman or who has ability to do something more are more special than other. Do you want to become one of it? It is just simple method to have that. What you need to do is just spending your time almost no but quite enough to have a look at some books. One of several books in

the top list in your reading list is usually Generalized Linear Mixed Models: Modern Concepts, Methods and Applications (Chapman & Hall/CRC Texts in Statistical Science). This book which is qualified as The Hungry Inclines can get you closer in getting precious person. By looking way up and review this reserve you can get many advantages.
