Programming ArcObjects with VBA: A Task-Oriented Approach Kang-Tsung Chang
ArcGIS users can streamline workflow, increase functionality, and improve efficiency by learning to program ArcObjects, the development platform for ArcGIS. Programming ArcObjects with VBA: A Task-Oriented Approach directly relates what you already know about ArcGIS to programming, making it easier to sort out objects, properties, and methods in code.

This volume, which adopts Visual Basic for Applications (VBA) for programming, first analyzes Geodatabase, the organization of ArcObjects, and ArcOjects help sources. It then reviews programming basics including the writing of code, calling subs and functions, Visual Basic Editor, code debugging, and user interface customization.

The book discusses the programming of ArcObjects for solving common GIS tasks such as dataset and layer management, data conversion, vector and raster data analysis, and much more. Each task-programming chapter has three parts: a quick review of ArcGIS commands; a discussion of related objects; and sample programs for problem solving.

An accompanying CD contains 95 sample programs, each of which describes its usage, contains a list of key properties and methods, and a listing and explanation of code. Many samples are divided into segments to better connect code lines with explanations. These programs, stored as text files, can be easily imported into Visual Basic Editor in either ArcMap or ArcCatalog to view and run. The CD also contains datasets that can be used to run the sample programs.

From reader reviews:

Jose York:

Do you considered one of people who can't read enjoyable if the sentence chained inside the straightway, hold on guys that aren't like that. This Programming ArcObjects with VBA: A Task-Oriented Approach book is readable simply by you who hate the perfect word style. You will find the facts here are arrange for enjoyable studying experience without leaving perhaps decrease the knowledge that want to give to you. The writer associated with Programming ArcObjects with VBA: A Task-Oriented Approach content conveys objective easily to understand by many people. The printed and e-book are not different in the written content but it just different in the form of it. So , do you nonetheless thinking Programming ArcObjects with VBA: A Task-Oriented Approach is not loveable to be your top list reading book?

Patricia Jones:

This Programming ArcObjects with VBA: A Task-Oriented Approach are usually reliable for you who want to be described as a successful person, why. The explanation of this Programming ArcObjects with VBA: A Task-Oriented Approach can be among the great books you must have will be giving you more than just simple looking at food but feed anyone with information that might be will shock your earlier knowledge. This book will be handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed ones. Beside that this Programming ArcObjects with VBA: A Task-Oriented Approach forcing you to have an enormous of experience including rich vocabulary, giving you test of critical thinking that we all know it useful in your day activity. So , let's have it and luxuriate in reading.

Steve Teegarden:

In this age globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The health of the world makes the information quicker to share. You can find a lot of references to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher that will print many kinds of book. The actual book that recommended for your requirements is Programming ArcObjects with VBA: A Task-Oriented Approach this guide consist a lot of the information of the condition of this world now. This specific book was represented just how can the world has grown up. The words styles that writer require to explain it is easy to understand. Often the writer made some analysis when he makes this book. Honestly, that is why this book ideal all of you.

Mandi Rice:

As a student exactly feel bored to reading. If their teacher questioned them to go to the library or even make summary for some reserve, they are complained. Just small students that has reading's internal or real their hobby. They just do what the professor want, like asked to the library. They go to generally there but nothing reading really. Any students feel that looking at is not important, boring and also can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this time,

many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Programming ArcObjects with VBA: A Task-Oriented Approach can make you really feel more interested to read.
