Why Life Science Manufacturers Do What They Do in Development, Formulation, Production and Quality: A History Lynn Torbeck

In a passionate retrospective of a successful career built on thinking statistically and applying that approach to quality in pharmaceutical manufacturing, Lynn Torbeck has created a "must-read" for anyone involved in product development, formulation, manufacturing and quality. Each of the 45 chapters in this book addresses a specific aspect of applied statistics and provides pragmatic applications on such topics as: • Can we save the Technical Conference? • %RSD friend, Foe or Faux? • OOS, OOT, OOC and OOSC • Can AQL be Zero? • Outlier Management • Why 5%? • Design Space Circa 1987 • Quality by Design Circa 1982 • Training Scores Because this book is not organized in a linear fashion, Torbeck encourages readers to dip into any chapter that is of interest. This book is not a statistics text per se; however, it shares the author's passion and decades of experience for statistics applied to pharmaceutical quality by showing how they can be used in real-world pharmaceutical quality problems.
